- Ability to work remotely in an effective manner
- Hours / Week - TBD, up to a max of 40 hours
- Access to a reliable internet connection, with flexibility to participate in team and/or client discussions over web-based communication platforms

Benefits

Paid Internship Opportunity - \$15.00/hour

- Gain valuable work experience in Telecommunications industry with exposure to multiple elements of the industry (Engineering, Legal, Business, etc.)
- Work independently and as part of a larger team
- Potential opportunities to do additional work with Select Spectrum both during upcoming school year and after graduation

Company Description

Since 2010, Select Spectrum has provided a wide range of consulting and transaction advisory services to organizations that hold, or would like to acquire or lease, wireless spectrum licenses issued by the FCC. Since 2014, we have increasingly focused on providing transaction-related and web-based services such as spectrum license and lease marketing and managing spectrum auctions. While the FCC has the statutory duty to initially issue wireless licenses through both auction and application processes, Select Spectrum's long term goal is to make <http://selectspectrum.com> the leading marketplaces for spectrum licenses after their initial issuance by the FCC.

- ✓ Spectrum Auctions: Select Spectrum works with spectrum rights holders and parties interested in obtaining spectrum rights by managing secondary market spectrum auctions and the Spectrum Marketplace.
- ✓ For Spectrum Rights Owners, Select Spectrum creates a variety of marketing information and contacts prospective buyers and lessees to negotiate maximum value in sale and lease transactions.
- ✓ For Wireless Operators and other companies seeking spectrum rights, Select Spectrum identifies FCC licenses available for purchase or lease and develops tactics to efficiently secure the targeted rights.
- ✓ For all organizations with a need to learn more about the spectrum market and to develop strategies related to wireless licenses, Select Spectrum provides consulting services grounded in years of wireless experience inside and outside major carriers.

Select Spectrum has managed or advised on over 300 spectrum license transactions totaling over \$300 million dollars for our clients. Building upon our success to date, we expect to continue to grow our business.
