

Looking for carrier-grade, **dedicated use spectrum** for **Fixed Wireless Access (FWA) indoor/outdoor and mobile applications**? Inquire today with **Select Spectrum** to obtain a quote for **CBRS Priority Access Licenses (PALs)** in your operating areas.

Dedicated use PAL channels are ideal for using as standalone, in conjunction with additional licensed frequencies and/or the CBRS General Authorized Access (GAA) shared tier to provide **network reliability and increase the quality of services that your customers depend on.**

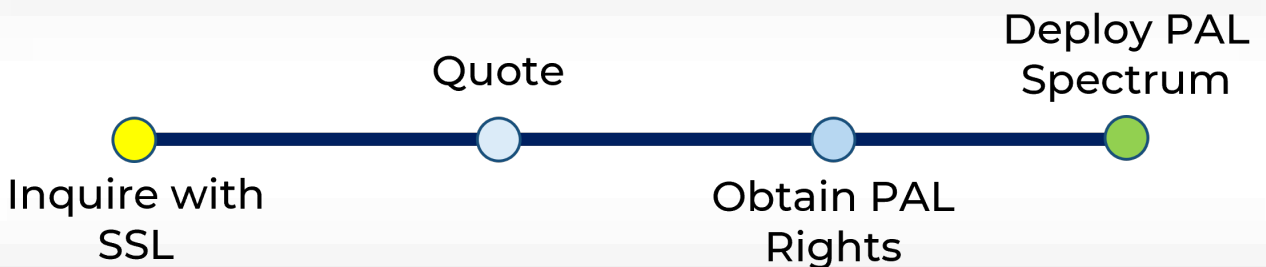

Example Fixed/WISP/Operator CBRS PAL Use Cases

FWA Solutions can be offered by Operators by using CBRS PALs **in areas where deploying fiber is challenging** as an **alternative to wired broadband.**

Mobile operators can deploy CBRS in areas where network congestion is common to **offload traffic, ensuring users experience faster data speeds and reduced latency.**

PALs are available **nearly nationwide** through the [Spectrum Marketplace](#). Visit the Select Spectrum website or **inquire to learn more about** our streamlined process to CBRS PAL spectrum rights.
